

FilmStarTM 4

Desktop FilmMaking Technology

FINALLY...

a faster way to make quality film from your desktop with...

- No Camera!
- No Darkroom!

From computer - to XANTÉ PlateMaker 4, FilmMaker 4, or ScreenWriter[®] 4, - to film, XANTÉ's new FilmStar 4 offers you the fastest and easiest way to process high resolution positive and negative film from your very own desktop.

With XANTÉ's patented Negative Enhanced Imaging Technology (NEIT), you can now print clear, crisp, negatives and positives on plain paper or film from XANTÉ's printers.

It's remarkably easy!

No Camera! No Darkroom!

Presenting XANTÉ's FilmStar 4, the fastest desktop FilmMaking system ever. From computer, to XANTÉ printer, to film, XANTÉ's FilmStar 4 offers you the fastest way to process high quality film from your very own desktop.

Save both time and money with this simple solution.

1. Design your job on any PC or Macintosh computer and proof on XANTÉ's PlateMaker 4, FilmMaker 4 or ScreenWriter™ 4, using plain paper. When you are ready to make film, simply place the Myriad film in your XANTÉ printer and print your film negative or positive by selecting the appropriate print options in the print dialog box.

2. Process your film by inserting it through the FilmStar 4. Let the film air dry for two to five minutes. Now you are ready to strip your negative, burn your plate, and put your plate on the press! No darkroom is necessary!
